

# New HomeGuard® Boat Delivered To Fire Department

The Sunset Beach, North Carolina Fire Department recently took delivery on a new HomeGuard® with DuraRib™ Foam Collar system. The boat – which was out in the water within an hour of its arrival – is being used by the fire department for rescue operations.

The HomeGuard® is powered by a 70 h.p. Johnson Rescue Pro outboard engine.

“The fire department at Sunset Beach already owns a Hurricane 472, which they purchased two years ago,” said John Verrecchia, Maritime Solutions, Inc. “They needed another rescue boat and had a very limited budget. The HomeGuard foam collar boat answered their requirements and was brought in within budget.”

The sale and delivery was made through Maritime Solutions, Inc., Ravenel, South Carolina.
