### GENERAL INFORMATION

The transom wells prevent water to flood the deck when the boat stops sharply or when it remains on mooring. They are specially indicated for boats heavily loaded at the aft.  
Transom wells P/N Z66019, Z66020 and Z66021 are mounted between the transom cross legs, simultaneously with the engine. A drain tube is mounted on the transom to empty the well.  
Transom well P/N Z66022 for the 700 SRO and 730 SRMN is mounted in front of the cross legs and the water is drained through the self bailers.  
Mounting of the aft frames P/N Z1167 and Z66002 is still possible when using these transom wells.

Transom wells are made of 4 mm aluminium plates to match the simple, functional and tough range of accessories for Zodiac professional and military boats.
